AKHILA T

Backend Developer — Node.js — Express.js — MongoDB

Calicut, Kerala — 9383408864 — tharolakhila1@gmail.com

GitHub — LinkedIn — LeetCode

PROFESSIONAL SUMMARY

Backend-focused full-stack developer experienced in designing and building scalable REST APIs, authentication systems, and database-driven backend architectures using Node.js, Express.js, and MongoDB. Skilled in role-based access control, JWT authentication, payment gateway integration, and repository-pattern-based backend design. Comfortable working across the stack with React.js for frontend integration when needed. Strong foundation in Agile development, debugging, and API design, with a continuous-improvement mindset suited to fast-paced product teams.

TECHNICAL SKILLS

Backend Development: Node.js, Express.js, RESTful API Design & Development, Dependency Injection (Inversify), Repository Pattern, Microservice-style Modular Architecture

Databases: MongoDB, SQL, Schema Design, TTL Indexing, Database Modeling

Authentication & Security: JWT Authentication, Role-Based Access Control (RBAC), OTP-based Verification, Secure API Design

API Integrations: Razorpay Payment Gateway, Third-party REST API Integration

Languages: JavaScript (ES6+), TypeScript

Frontend (Supporting): React.js, Redux Toolkit, HTML5, CSS3, Responsive UI

Tools & Practices: Git, GitHub, Postman, VS Code, Agile Development, Debugging, Testing, Technical Documentation

PROFESSIONAL EXPERIENCE

MERN Stack Development Trainee – Brototype Dec 2024 – Present

- Developed full-stack web applications using the MERN stack, focusing on scalable and maintainable architectures.
- Built RESTful APIs, authentication systems, and database-driven functionalities for real-world projects.
- Implemented secure online payment integration using Razorpay for seamless checkout experiences.
- Developed e-commerce functionalities including product management, cart operations, order processing, and coupon systems.
- Worked on healthcare-focused applications involving role-based access control and appointment management.
- Collaborated with fellow developers and mentors during project development and code reviews.
- Improved application performance through debugging, testing, and optimization techniques.

PROJECTS

PregnaCare – Pregnancy Care Platform – *Personal Project (Ongoing)*

- Architecting a scalable backend using Node.js, Express.js, TypeScript, and MongoDB with a repository-pattern-based design.
- Implementing JWT authentication and Role-Based Access Control (RBAC) for secure access by patients, doctors, and administrators.
- Building backend logic for pregnancy tracking, appointment scheduling, doctor onboarding, and chatbot-based patient guidance.
- Designing modular RESTful APIs following clean architecture principles for maintainability and scalability.

ZAPZONE – Full Stack E-Commerce Platform – *Personal Project*

- Built and integrated 20+ RESTful APIs supporting user, product, order, payment, and admin workflows using Node.js, Express.js, and MongoDB.
- Implemented backend features including authentication, product management, cart, wishlist, coupon system, order processing, and inventory management.
- Integrated Razorpay payment gateway for secure online transactions.
- Developed admin modules for inventory management, sales reporting, order management, and coupon administration.
- Built a responsive React.js frontend integrated with backend APIs to deliver a complete full-stack application.

EDUCATION

Post Graduate Diploma in Computer Applications (PGDCA) Sep 2023 – Oct 2024

GNET Institution Kohinoor

Completed academic and practical projects focused on modern web application development and software engineering principles.

Bachelor of Arts in English Aug 2020 – Aug 2023

Arts and Science College Tanur

Developed strong communication, analytical, and documentation skills that support effective software development and teamwork.

ACHIEVEMENTS

- Earned the LeetCode 50 Badge through consistent Data Structures and Algorithms problem-solving.
- Built multiple full-stack web applications using the MERN stack.
- Continuously improving problem-solving and software engineering skills through coding challenges.

ADDITIONAL INFORMATION

- Passionate about backend engineering, scalable systems, and modern web technologies.
- Strong interest in healthcare technology, product development, and user-centric software solutions.
- Quick learner with a continuous improvement mindset and enthusiasm for adopting new technologies.
